GOVERNMENT OF PENNSYLVANIA.

DAVID R. PORTER, Governor.
FRANCIS R. SHUNK, Secretary of State.
ALMOND H. READ, Treasurer.
OVID F. JOHNSON, Attorney General.

COURTS IN PENNSYLVANIA.

SUPREME COURT.

The Supreme Court holds six terms for arguments, &c., in the Five Districts of the State, and adjourned Courts as they may deem necessary. The regular Terms are—

For the Eastern District, composed of the City and County of Philadelphia, and the Counties of Delaware, Chester, Montgomery, Bucks, Northampton, Lehigh, Wayne, and Pike, at Philadelphia, in March, to continue two weeks, and 2d Wednesday in December, to continue three weeks. The last Monday in July is the return day for July term, but no court is then held.

For the Lancaster District, composed of the Counties of Lancaster, York, Dauphin, Lebanon, Schuylkill, and Berks, at Lancaster, 2d Monday in May.

For the Middle District, composed of the Counties of Northumberland, Union, Columbia, Centre, Mifflin, Juniata, and Huntingdon, McKean, Clearfield, Lycoming, Potter, Tioga, Bradford, Susquehanna, Wayne, and Luzerne, at Sunbury, 2d Monday in June.

For the Western District, composed of the Counties of Alleghany, Westmoreland, Somerset, Fayette, Washington, Green, Beaver, Butler, Mercer, Crawford, Erie, Warren, Venango, Armstrong, Indiana, Jefferson, and Cambria, at Pittsburg, 1st Monday in September, to continue four weeks.

For the Southern District, composed of the Counties of Franklin, Adams, Cumberland, Bedford and Chambersburg, on the Monday week next following the last week of the Term of the Western District.

A CARD.

PIANO FORTES.

We, the undersigned, take great pleasure in recommending to the lovers of music, an article manufactured by D. B. GROVE, termed by him the

GRAND ACTION PIANO FORTE:

An instrument which, for tone, delicacy of touch, grandeur and durability of workmanship, is not surpassed by any made in this country. Too much praise cannot be awarded to his enterprising workman for the skill displayed by him in the manufacture of these instruments, the whole interior arrangement of which, is, we understand, the production of his own ingenuity and invention.

We are gratified to learn, judging from the great demand of this article, and the very extensive sales made in this city and in various sections of the country, that he is about to be amply rewarded for the heavy expenses incurred in bringing the article to its present state of perfection.

We feel great confidence in recommending those who may be desirous of purchasing, to call at the establishment of Mr. GROVE, No. 338 Market street below Tenth, believing that they may procure, on the most advantageous terms, all articles in his line, that will on trial give entire satisfaction.

E. N. SCHEER,

No. 266

CHESTNUT STREET, NEAR TENTH,

South side,

PHILADELPHIA;

MANUFACTURER OF

PIANO FORTES,

Offers to the Merchants from the West and South, Instruments which he warrants of the first quality as to tone, touch and durability. The wood used in their construction has been carefully and for a long time prepared; and the work in the different stages laid by and fully tried, so that when finished his PIANOS will stand any climate.

HE ALSO OFFERS HIS NEWLY-INVENTED

PATENT HARP GUITAR,

Which in power and superiority of tone approximates to the instrument whose name it bears. In addition, the ordinary

SPANISH GUITAR,

AND THE

HARMONICA,

All the product of his own manufactory.

CHALLENGE BLACKING;

Put up in cases and casks, ready for shipment or otherwise.

The reputation of Mason's Challenge Blacking is fully and permanently established, both in this and the Southern, Western, and other markets. It is suitable alike for all climates, as years of experience has proved; and from its acknowledged superiority over every other Blacking, it is recommended with perfect confidence.

The manufacturer has in his possession certificates from the most respectable and well known Druggists, Chemists and merchants in this City, bearing testimony to the unparralleled excellency of the Challenge Blacking. The certificates can be seen at his store, where the public are respectfully invited to call and examine them.

MASON'S IMPERISHABLE

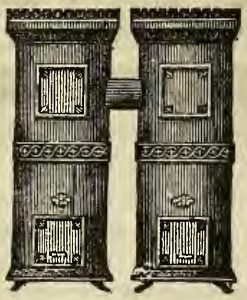
OLMSTED'S PATENT STOVE,

MANUFACTURED BY



SAMUEL LLOYD,

And Sold,

Wholesale and Retail,

AT THE GIRARD BUILDINGS, 406 MARKET STREET.

The objects aimed at in the construction of this Stove are—to be simple, so that it can be easily managed—to be quickly kindled—to be capable of affording a mild or intense heat, according to the weather—to preserve the air of the apartment pure and wholesome—to avoid all inconveniences from dust, and finally to be cheap, durable, and economical in the use of fuel. How far this apparatus fulfils these conditions, may be inferred from the following certificates and recommendations.

Extract from an article published in the Franklin Journal, as the result of some experiments on Temperature, connected with the use of Prof. Olmsted's Stove, *by J. Griscom, L. L. D.*

After "registering" many interesting and important facts in reference to the Stove, he adds: "But there are two other advantages in the construction which Professor Olmsted has adopted, *First*, by increasing the extent of heated surface, so as to prevent the iron from ever becoming so hot as to lose its polish by oxidation, and thereby not only to become itself rapidly deteriorated, but also greatly to injure the quality of the air. *Second*, the cold air which enters the room, and necessarily forms the lower stratum, flows towards the stove, and ascending in the open and heated cylinder of the radiator, forms a rising column of warm air, which by its diffusion produces a mild summer heat throughout the chamber, rendering unnecessary the evaporation of water to counteract the usual deleterious effects of a hot stove. I found on one occasion the temperature of the air in this heated column to be 150 degrees, while at the same time the thermometer, with its bulb resting on the last joint of the stove pipe, sunk to 110 degrees, the thermometer in the room being then 70 degrees, and outside of the house 36 degrees. Both the furnace and the radiator may be too hot to be endured by the hand, while the end of the pipe remains barely warm."

$500 *against* $100.

THE CONCAVE SELF-SHARPENING

PLOUGH.

WILLIAM BEACH, (THE PATENTEE,)

424 *MARKET STREET, PHILADELPHIA,*

Keeps constantly on hand the above superior PLOUGHS, of different sizes. These Ploughs are lighter draft, and turn stubble, weeds or manure under better, without choking, than any other kind, and they save the trouble of going to the Smithshop, and four-fifths of the expense of other Ploughs. The Inventor is of opinion that no other kind would be used, if the good qualities of these were known, and he also offers the above Plough in contest with any other kind, Five Hundred Dollars against One Hundred, not desirous of winning money, but of showing the great improvement in the most useful tool in the world. He also keeps Cultivators, or Hoe Harrows, and Straw Cutters, of the most approved kind. Those wishing to purchase would do well to call and examine before they purchase elsewhere.

HE IS ALSO OF **TREE** AND PENN **TREE**

THE PATENTEE THE **STOVE,** THE OAK **STOVE.**

For parlours and halls, it is far preferable to a Grate, and more durable and ornamental, with an opening to see the fire. It gives a regular and pleasant heat, avoids the dust and ashes, and requires very little attention, for when the urn is filled with coal it supplies itself until it is burnt out; and the small coal without the dust taken out will make heat enough for a large parlour. Any one, after one week's trial, if they do not suit, will be at liberty to bring them back, and receive their money. Also an assortment of other stoves. All orders punctually attended to, and thankfully received.

Would most respectfully call the attention of the public to their improved System of Cutting, which for perfection of principle and simplicity in application, is warranted not to be equalled by any other method ever adopted, as the shapes and positions, which are as necessary to know as the size, cannot be obtained without a similar instrument. It has been the study of the inventor for the last three years to perfect the art, which he feels confident he has accomplished in the production of the Measuring Machine, the superiority of which, over any other method, he holds himself ready to prove by trial to any who may doubt the fact. All coats made at this establishment are warranted to give entire satisfaction, both as regards fit and workmanship, in default of which the money will be refunded.

TO MANUFACTURERS, MILL OWNERS AND OTHERS

INTERESTED IN WATER POWER,

THROUGHOUT THE UNITED STATES.

The undersigned having become sole owner of the Patent Right of *Abbott's Hydraulic Engine*, by an assignment of the original patent, reserving the states of New Hampshire and Vermont, and having at great expense applied the principles of said Engine, in such a manner as to produce from equal quantities of water acting in similar situations, at least twenty per cent more power than is produced by the best constructed over shot wheel now in use. Ten of the above Hydraulic Engines being now in operation, propelling Cotton and Woolen Machinery, Paper Mills, &c. &c. Some of which have been in successful operation for more than three years, which time is considered a proper test of the principles and operation of the same, as well as to form a tolerable correct judgment of their durability. This Engine is applicable to all situations where a fall of five feet and upwards, to almost any extent can be had, and to all purposes of manufacturing, and is susceptible of being built from five to almost an indefinite number of horses power. Practice having now fully proved the proportions of the work safe, to such an extent that the subscriber challenges a trial of strength and regularity of motion, with any other water wheel of equal power now in use. This patent is claimed as an improvement on the chain of buckets as patented by a Mr. Cooper, in 1784. Explanations and engravings of which may be seen by reference to Rees's Cyclopaedia, Nicholson's Operative Mechanic, &c. The accompanying cut represents an Engine erected by the subscriber for Copeland Boyd, Esq. of Bethlehem, Pa. on the Lehigh Canal, fifty miles from the city of Philadelphia; where all who may wish to acquaint themselves with the practical operation of the Engine are respectfully invited to call, examine and decide for themselves in accordance with the evidence produced from the operation. This machine is of a medium size, and is used for propelling Engines for the grinding of rags, for the manufacture of paper, which service for water wheels, is considered by Millwrights to be the most *trying* of any resistance applicable to them. It is therefore believed, that should the Hydraulic Engine operate *satisfactorily* in *such* cases, that there could no longer remain a doubt why it should not operate with *equal certainty* for *all* other manufacturing purposes. The reasons urged by the subscriber as a ground of justifiable preference over other wheels are, first, the Hydraulic Engine requires but about two thirds the water to drive them, required by other wheels of the same power—its motion is much more uniform and steady, and is less liable to impediments from ice and frost, and to be retarded by back water, as it presents much less surface. And its velocity is as 2 to 8, the resistance being as the squares of the velocity, which makes the resistance in the one instance 4, and the other 64. It requires but about one third the room of the overshot or breast wheels, and does not require the expense of wheel pits, or so much time to build or put them in operation. They are better adapted to high falls, and falls so high as cannot be used by other wheels the whole distance, and are capable of being made more durable.

Its effect is nearly equal to the whole specific gravity of the whole quantity of water multiplied into the whole fall, and is capable of being located more safe and secure from inundations.

The subscriber invites manufacturers, millwrights and all others interested in water power, to an examination of specimens of the work, at 394 Girard Row, where persons will be in attendance at all times to give explanations or any other information required relating thereto.

They would particularly call the attention of Rail Road Companies to the improvements they have made in Locomotives, by which either Anthracite Coal or Wood can be used, with perfect facility, in boilers of the ordinary horizontal form. Also, to their eight-wheel Engines, which are admirably adapted to roads having high grades to overcome, and are capable of drawing heavier loads, with less injury to the road, than any other description of Engine of the same weight used in this country.

Satisfactory references can be given as to the power and workmanship of their Engines, by those who have used them.

ELECTRICO-MAGNETIC

REMEDIES,

OR MEDICINES FOR THE CURE OF CHRONIC DISEASES.

These remedies and medicines may be obtained at the Office of Dr. H. PARVIN, No. 126 Pine street.

Dr. P. has had long experience in the use of SHERWOOD'S Electro-Magnetic remedies; will prescribe them in cases where they are efficacious, and is confident they will effect cures. He will treat all other cases either with the usual medicines, or with his ELECTRICO-GALVANICO MAGNETIC apparatus. His medicines all possess some modification of electrical affinity, and operate by the agency of that property.

Investigations in the theory of electricity, as connected with organized animal matter, and particularly in that of the human body, demonstrate that all animal motion is the natural effect of the two opposite poles, causing muscular contractions and expansions. Morbid action in the human system is an unequilibrium of natural motion, and cannot be removed from it except by the operative influence of this invisible agent of nature. All medicines that have any tendency to remove morbific action from the system, must therefore necessarily possess some modification of electrical affinity, as there is no other operative property by which to increase, diminish, or change natural motion. It is obviously impossible for the human body to be in a diseased condition, and at the same time in a state of equilibrium of natural motion—for a universal equilibrium of natural motion in the human system constitutes PERFECT HEALTH.

THE WASHINGTON HOUSE,

CAPT. J. P. JEFFRIES,

No. 223 Chestnut Street, next door to the Masonic Hall,

PHILADELPHIA.

THIS splendid NEW HOTEL is now open for the reception of company. The establishment was begun, continued, and finished, with the express design of securing to the city of Philadelphia the desideratum—a house *capacious*, yet *commodious*—*public*, yet *private*. A Hotel, where men of business might find accommodations suited to their active habits; and where families might enjoy all the comforts of a *private, fashionable* mansion. How far the proprietor has fulfilled this object, he confidently submits to the opinion of those who may please to honor THE WASHINGTON with a visit.

The situation is one of the most central, in the most fashionable street in this city. The *Public Dining Room*, and *Public Parlor for Gentlemen*, are on the most extensive scale. The *Private Parlors for Ladies and Families*, to which there *is a private entrance*, are furnished in the most tasteful and fashionable style. The *Ladies' Dining Room*, or *Private Ordinary*, is arranged in keeping with the Private Parlors, all of which cannot be excelled in design and finish.

To those of the travelling public, whom the proprietor has had the honor to serve in his capacity of Master of the Steamboats of New York, Philadelphia, and Baltimore, he needs say but little, trusting his assiduity heretofore will prove to them a sure guarantee for the future. But to *all* who may favor him with their company, he pledges an unremitting watchfulness and attention, to secure to them comfort and convenience, whilst sojourning at THE WASHINGTON.

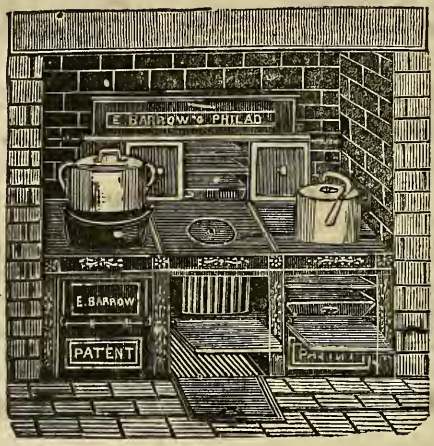
BARROW'S PATENT COOKING RANGE.



The undersigned has made arrangements with Mr. Barrow to make and vend the above articles. This apparatus was exhibited at the last Fair of the Franklin Institute, where its superiority over all others exhibited, was attested by obtaining from the Committee on Premiums, the SILVER MEDAL. Boilers can be placed back of the cylinder, which will, with the same fire, supply sufficient hot water for bathing and culinary purposes.

SAMUEL LLOYD, 406 Market Street.

The following certificate will show the estimation in which it is held by those who have used it:

The undersigned have had in use in their families, for some time past, Barrow's Patent Cooking Range, which has operated to their entire satisfaction. Its simplicity is such that any person desirous of using it, can do so without difficulty, while at the same time it will do more cooking with a similar amount of fuel than any other apparatus that has come under our observation.

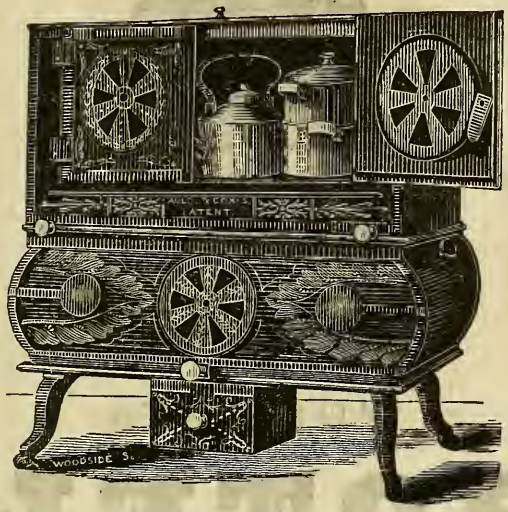
NONPAREIL

COOK STOVES.



AULD & COX'S PATENT.

MANUFACTURED AND SOLD BY SAMUEL LLOYD,

406 MARKET STREET, PHILADELPHIA.

The above Stove, which is entirely original, and totally different from any of its predecessors, has succeeded even beyond the most sanguine hopes of those who study domestic comfort and economy.

These Stoves preserve an even temperature and pure atmosphere, by carrying off the gas, effluvia and surplus heat, while all danger from accidents by fire is effectually prevented. They may also be used as PORTABLE AIR HEATERS, to warm the apartments over them. Different sizes, calculated for Hotels, Steamboats and private families, are supplied by the manufacturers on reasonable terms.

For the accommodation of those who cannot conveniently procure Anthracite coal, a pattern for burning wood, and another for Bituminous coal, has been constructed.

The subscribers, having used AULD & COX'S PATENT COOKING STOVE, cheerfully testify to its great superiority over all others with which they are acquainted; and certify that said Stove requires but one ton of coal to do the cooking for a family of more than forty persons, for three months, and that said Stove is managed with very little trouble, and performs every variety of cooking in the best manner.

BETWEEN

CHESTNUT AND MARKET STREETS.

Horatio Harbach (late of the Forrest House) respectfully informs his Friends and the Public, that he has taken this well known Establishment, and has entirely repaired and improved it, and is now prepared to receive transient customers.

His Rooms are large and airy, and furnished neatly.

His Bar is kept continually supplied with the choicest Liquors the Markets can afford, also a superior lot of Cigars of different brands.

His Table cannot be surpassed by any other in this city, and his Servants are active and obliging.

He hopes by prompt attention to merit the patronage of his old friends, and the public in general.
